

API/Delta Chapter Hosts JOINT INDUSTRY SOCIETY LUNCHEON

The Delta Chapter of the American Petroleum Institute recently hosted the Annual Joint Society Luncheon along with 21 other Representatives from energy related organizations at the Roosevelt Hotel in New Orleans. The sold out event was a huge success in part to the key note speaker, Mr. Randall Luthie, President of the National Ocean Industries Association (NOIA).

NOIA is an association comprised of approximately 270 companies that are associated with the development of oil, gas and other energy sources from the outer continental shelf. As a trade organization, they are solely focused on offshore development and its membership includes majors, independents, producers, operators, service companies, suppliers, ship and vessel builders, financiers and law firms. Prior to becoming the Director of NOIA, Luthie served as Secretary of the Minerals Management Service under the Bush Administration. His professional background and understanding of deepwater drilling was well evident in his presentation.

Luthie spoke of "What Next" regarding the moratorium and the De Facto Moratorium on all Gulf Operations due to lack of permitting. He briefly reviewed the President's actions since the Macondo well explosion. He noted that less than a week after the creation of the oil spill commission, on May 27, Department of Interior Secretary Ken Salazar postponed consideration of Shell's proposal to drill up to five exploration wells in the Arctic. Before the spill, Obama cancelled the four remaining lease sales in the 2007-2012 program scheduled for the Chukchi

and Beaufort Seas, and the he formally withdrew Alaska's Bristol Bay from the oil and gas leasing program in March. And, as well known in Louisiana, the DOI cancelled the August 2010 WGOM Lease Sale.

Luthie also mentioned that recently Salazar proposed establishing an "Ocean Energy Safety Institute" designed to facilitate research and development, training, and implementation in the areas of offshore drilling safety, blowout containment and oil spill response. The Institute would be a collaborative initiative involving government industry, academia and scientific experts. He provided detailed objectives of the Ocean Energy Safety Institute in his presentation.

The recent passage by the House of Representatives of the CLEAR Act was of a serious concern to Luthie. "We believe that should this measure become law the end result will be more dependence on foreign oil and more American jobs lost" he said. The bill also did little to increase actual safety. "Industry

fully supports increased awareness and safety in the wake of the Gulf of Mexico accident" said Luthie. "Unfortunately the passage of CLEAR would do little to increase actual safety and is a job killer."

The good news is that Congress adjourned for the year without the bill being considered by the Senate. And, given the results of the November 2 elections, he felt that the GOP control of the house would stop this bill, as written, from moving forward.

Luthie was optimistic about the newly elected Members of Congress and he noted that the House Energy and Commerce Committee would see new leadership. "The Committee Chairman position has not been decided" pointed out Luthie. He explained that current Ranking Member, Joe Barton, (TX) is running up against Republican term limit rules and seeking a waiver to gain the Chairmanship; while Fred Upton (MI) appears to be the front-runner with John Shimkus (IL) and Cliff Stearns (FL) also in the mix

In the Senate, NOIA continues to closely monitor the very interesting Senate race in Alaska. It is not yet clear who will assume the Ranking Member position of the Senate Energy and Natural Resources Committee, but the choice appears to be between current Ranking Member Lisa Murkowski should she prevail in the Alaska contest, and Richard Burr of North Carolina. Current Chairman Jeff Bingaman (NM) will retain his position.

Mr. Luthie ended with taking questions from the floor and graciously taking time to answer all questions.

SCHOLARSHIP APPLICATIONS NOW AVAILABLE

The American Petroleum Institute – Delta Chapter will again offer college scholarships for 2011 – 2012 school year. The API – Delta Chapter scholarship program is designed to help students of exceptional promise reach their full potential through education.

The API – Delta Chapter understands the financial difficulties facing college students today. Funds from the annual Clay Shoot Tournament and the Golf Tournament are used to fund the scholarships. “The Delta Chapter awarded \$20,000 in scholarship to 30 students last year” said Board Chair-

man John Dribus “and we look forward to matching that number again this year.”

The scholarships are given for a wide variety of experiences, career goals and higher education plans. However, API will give preferences to those pursuing a career in Petroleum or Chemical Engineering, Geology and the sciences. Scholarships are awarded to incoming College Freshmen or a student who is currently attending a four-year accredited college, working towards a Bachelors or Masters degree.

An applicant must submit a completed application form along with a college or high school transcript (ACT or SAT score reports are also required for entering freshmen) by March 15th and must be referred by an API/Delta Chapter member. The full application and guidelines can be found on the API web-site at www.api-delta.org.

For further information, please contact the Scholarship Chairperson, Peggy Bourgeois at (504) 367-1721 or at (504) 289-4653 or any member of the scholarship committee. A copy of the form is on page 8.

FETCH Oil & Energy Saturday – Louisiana Children’s Museum

On Saturday, August 21, 2010, API and SPE coordinated the FETCH Saturday at the Louisiana Children’s Museum. This event had 15 exhibits hosted by 9 different societies highlighting science and math principles. The focus of the event was to show how math and science can be fun as well as to provide educational outreach for children ages 2-16, parents, and teachers. The event had around 700 visitors and ran from 11 AM to 3 PM. What is equally impressive is that we had 61 volunteers show up to represent our industry.

The participating organizations and their exhibits were:

API - Receive a free classroom energy CD

API - Minerals, Rocks & Fossils (Examine and identify rocks, minerals and fossils up close)

Desk and Derrick - Color My World of Energy

NACE - Corrosion Science (Learn about how corrosion occurs)

NACE - NACE Fruit Battery (Transform fresh fruit into a working battery)

NOGS Oil Finder Game (Play an oil finder game using drilling dollars)

NOGS Fossil and Mineral Collection (Meet meat eating and plant eating dinosaurs from the NOGS collection)

NOGS - Forams with Microscope (Look through a microscope to use organisms to date rocks)

NOGS - Tapestry of Time and Terrain (Use a geologic map of the USA to identify geologic occurrences and places)

NOGS - Sand Box (Dig for dinosaur bones in a sand box)

NSBE - Boats Afloat (Design a boat out of aluminum foil to hold a lot of pennies)

SGS - Sounds through the Ground (Listen to sounds through the ground)

SPE - Magic Suitcase (Explore a magic suitcase)

SPWLA - Rock Measurements (Learn about rock property’s measurements)

SWE - Gumdrop Domes (Build a geodesic dome out of gumdrops and toothpicks)

API/Delta Chapter Celebrates the Holidays

The API/Delta Chapter Board of Directors recently hosted a Christmas Volunteer Appreciation Social at the historic Benedict Plantation in Mandeville. The event was an opportunity for the Delta Chapter to thank the many volunteers that make the spring Clay Shoot and the fall Golf Tournament the success that it is.

A total of 40 members and volunteers enjoyed the evening with great food and drinks. It was a pleasant time to mingle and to socialize without having to worry about any work getting done!

Newly elected Chapter President Steve Freeman welcomed the guest and played Santa as he gave away beautiful Poinsettia plants as door prizes.

On behalf of the Board of Directors.....

*Merry Christmas and Happy Holidays to All
from your*

Delta
Chapter

JOINT SOCIETY TECHNICAL LUNCHEON

Developing an early-warning system for Well/Reservoir problems was the topic of the recent Technical luncheon held on August 17th. The event was co-hosted by API – Delta Chapter and the Society for Petroleum Engineers - Delta Section (SPE). The key note speakers were Mr. Chris Fair of Oilfield Data Services, Inc. and Dr. Fred Goldsberry of WAVEX®, Inc. Both speakers brought to the table an abundance of knowledge in reservoir dimensioning and mapping.

Dr. Goldsberry holds eleven U. S. Patents in control systems, energy conversion systems, geopressured secondary oil recovery, nuclear waste storage, and transient well testing. He formed WAVEX®, Inc. in 1995 based upon his longstanding interest in the engineering mechanics of pressure transient phenomena and has practiced wave mechanics based reservoir mapping since that time as an independent engineering consultant.

Mr. Fair started Oilfield Data Services, Inc., a reservoir/production engineering consulting firm that specializes in well test interpretation and field management of well flowbacks/exploration DSTs.

Goldsberry and Fair each provided a slide show that provided in depth information into the patented technique for reservoir dimensioning/mapping. Goldsberry explained that WAVEX® is a new technology that incorporates capillary threshold or initiation pressure, capillary flow, and wave mechanics into the pressure transient model. The method allows discrete identification of reservoir boundaries and integrated volume calculations during the test. Fair explained how Oilfield Data Services, by using WAVEX® technology processed data directly from a fixed choke transient pressure test, not as a “history matching” process. He further explained that there is no starting “guess” as to what the reservoir looks like. The process is performed “blind”.

Again this year, API brought the event to two locations. The Holiday Inn – Superdome hosted the event on the South shore, while Chevron, through the efforts of Berik Zhakiyanov hosted the event on the North shore. Both venues were sold out.

API’s next event will be the Joint Society Luncheon to be held on Tuesday, November 9th. Watch for further details.

2010 API Golf Tournament

The 2010 API Delta Chapter Golf tournament held on September 17th at the Covington Country Club was a huge success!! Despite the current economic environment and drilling moratorium, 39 teams participated in the popular two-round tournament. There were plenty of cool beverages and delicious food to make this an enjoyable event for all in spite of the South Louisiana heat and humidity. The API Golf Committee would like to thank everyone involved in helping make the 2010 API Delta Chapter Golf Tournament a success!

Through the generosity of all the corporate, team and hole sponsors we were able to raise over \$18,000 dollars. The proceeds will be used for our scholarship program, teacher mini- grants, the Louisiana Children’s Museum, and the other opportunities to promote education and the Petroleum Industry in the Greater New Orleans area. We could not have achieved this without your support and we are truly thankful!!

We hope to see you all at next year’s 2011 API Delta Chapter Golf Tournament to be held on September 16th once again at Covington Country Club!

2010 API Golf Chairman,
Steve Freeman

ESSAY:

Please write an essay of 400 – 600 words, (typed, double spaced on a separate page) on the following question.

Describe your vision for your career path (declared major) and where you see yourself working and living following graduation. Which of your personal qualities and life experiences do you believe will be most beneficial in helping you to reach your goals?

Please return this application with a certified college transcript (high school transcript and ACT or SAT scores for entering freshmen) to:

Advancing Reservoir Performance

Technology and Expertise to Create More Value from Your Reservoir

Baker Hughes is focused on helping you advance the performance of your reservoirs.

Every day, in producing basins around the world, our experts evaluate customer needs, engineer systems to match each application, and deliver advanced technologies that improve operating efficiency and create more value from the reservoir.

Our reservoir consulting services help you understand how to exploit the economic potential of your assets. Our drilling, evaluation, completion and production technologies consistently achieve superior results that lower costs, reduce risk, improve productivity and increase ultimate recovery, *advancing reservoir performance*.

Let us help you create more value from your reservoir. Visit www.bakerhughes.com or contact your nearest Baker Hughes representative.
