2013 Technical Luncheon

Tuesday, August 13, 2013

Presented by

American Petroleum Institute Delta Chapter (API)

and

The Society for Petroleum Engineers Delta Section (SPE)

~

“Gulfstar”

An Alternative Deepwater Development Strategy

Key Note Speaker:

Stafford Menard joined Williams in 2007 as a Project Manager in Houston, Texas. After leading the conceptual and technical development of Gulfstar FPS, Mr. Menard more recently has focused on the commercial development and sale of production handling agreements for Williams' deepwater services.

Mr. Menard started his career in 1973 as a structural design engineer for J. Ray McDermott in New Orleans, Louisiana. He worked on several large deepwater projects beginning with Exxon's Hondo Platform, which was installed offshore California in 1976. In 1994, Mr. Menard joined NATCO as the Vice-President of Gulf Coast Region based in New Iberia, Louisiana.

A native of Maurice, Louisiana, Mr. Menard earned a bachelor of science degree in civil engineering from the University of Southwestern Louisiana. He is a member of ASCE and is active in several industry associations.
